ThermoCamera DM60-W1

Screening device for rapid measurement of body temperature.
Visible optical resolution 1920 x 1080 px.

Product features

- Intelligent temperature measurement system
- Non-contact measurement over long distances, fast and safe.
- Built-in reference black body for better calibration.
- Fast screening measurement body temperature.

Main parameters

- Resolution: 384 x 288 px
- FOV: 25° x 19°
- Focal length: 18 mm
- Thermal sensitivity: $\leq \pm 0,06^{\circ}\text{C}$
- CCD: 1920x1080 px
- Measurement accuracy: $\leq \pm 0,3^{\circ}\text{C}$
- Temperature range: 20°C - 50°C
- Working temperature: 0-40°C
- Measuring range: 3-10m

Thermo HD camera for synchronous temperature display human body, remote video transmission, automatic alarm detection, audible alarm, video recording
