ThermoCamera TE-W300H

Thermocamera for automatic body temperature sensing with infrared thermal imaging.

Product features

- 24 hour continuous monitoring
- Contactless quick screening
- An external monitor is available
- High accuracy of body temperature measurement

Main parameters

- Resolution: 160 x 120 px
- Temperature range: 20°C - 50°C
- Measurement accuracy: $\leq \pm 0,3^{\circ}\text{C}$
- CCD: 1.3 mil. pixels
- Working temperature: 0-40°C
- LCD screen: 3.5"
- Measuring range: 2-5m
- An abnormal body temperature alarm, automatic scanning and others

Standard components

- BlackBody calibration device
- ThermoCamera
- Video output cable
- Power adapter
- TF card
- Battery
- Carry case
